Action Points

- **Membership of the group** - suggestions were to invite pharmacists from Glasgow and Lothian and a biochemist from Lothian to join the group.

- **Dynamic Function Handbook** - Drs Williamson and Miles were to review the Standard Synacthen and the Dexamethasone Suppression Tests whilst Drs Miles and Shaikh were to look at the use of Arginine or Glucagon to test for growth hormone deficiency with the view of standardising these tests.

- Both the **Childhood Obesity Guideline and the Adrenarche Guideline** have been agreed by the SPEG steering group and reformatted based on the SPEG standardised format. They are now ratified by the steering group and are waiting to be placed on the SPEG website. Copies of these two guidelines are attached as part of the documentation for the steering group meeting.

- **Septo Optic Protocol** - Dr Shaikh has presented a draft document to the SPEG Protocols Group and will present this document to the steering group.

- **2016 goals**
  - Biochemist and pharmacist to join group (in ad
  - Vitamin D deficiency guidance
  - Septo-optic dysplasia guideline (with respect to endocrine management)
  - Dynamic Function Tests Handbook Update
  - Improved use of website
